PROFESSIONAL SUMMARY

Full-Stack Engineer with a strong front-end foundation and hands-on experience delivering SaaS platforms. Passionate about user-friendly interfaces, agile delivery, and continuously learning modern software technologies.

EXPERIENCE

All In Factory (Remote)

Feb 2024 – Present

Full-Stack Engineer – React & Laravel Specialist

- **findMyBoat.com**

- Built a yacht rental platform connecting boat owners with renters, featuring **map-based search with advanced filters**, **dynamic calendar scheduling**, and **real-time chat**.
- Developed **role-based dashboards** for owners and renters, where owners manage listings and reservations, and renters browse, book, and review boats.
- Supported bookings, personalized quotations, **multilingual** and **multi-currency** experiences.

- **konklua.com**

- Built a real estate platform to conduct **market studies**, including **property** and **promotion** tracking, **typology** classification, and **trend analysis**.
- Implemented **comparisons** across properties and promotions, with **historical evolution** and custom **PDF reports**.
- Developed a **multi-tier subscription system** with **Stripe**, supporting automated events (**upgrades**, **cancellations**), **RBAC** dashboards, and **email services**.

ENVAST (Sahloul, Sousse)

Feb 2024 – Jun 2024

Full-Stack Engineer Intern

- Developed **Agile Deep Assistant**, a web and mobile platform optimizing SCRUM processes with **modular Laravel backend**, integrated with **Jira APIs** and a **RAG pipeline** for automated user story generation and developer assignment suggestions.
- Built **interactive sprint rooms** in **React Native** with **real-time participation**, voting, task estimation, and **AI-driven actionable insights** for retrospectives.
- Enhanced team productivity with a **monthly calendar**, **real-time notifications**, streamlining sprint planning and providing meeting summaries.
